Delaware County Immunization Coalition

# the **Shingles Vaccine** should be on your to-do list!

Shingles (Zoster) vaccine helps prevent Shingles. It is caused by the same virus that causes chickenpox. The virus stays in your body and can resurface any time as Shingles – a painful, blistering rash. Even if you feel healthy, your risk for Shingles increases as you get older.

**FREE Shingles (Zoster) vaccine is available at the Delaware County State Health Center for uninsured or underinsured adults who are 60 years and older.**
